Mohammed Ahmed Alqaffas

Software Engineer | Full-Stack & Front-End Developer

mohammed.alqaffas1@gmail.com +966576687240 Eastern Province, Saudi Arabia

/in/ma16q Ma16q

PROFILE

Senior Computer Science student with professional experience in full-stack development and cloud deployment. Skilled in React, Next.js, Node.js, Express.js, PostgreSQL, and Prisma, with hands-on experience in REST APIs, authentication, testing, and production deployment. Also experienced in Android development and active in technical communities and events.

EDUCATION

Imam Abdulrahman Bin Faisal University 2022 – Present
Bachelor of Computer Science Saudi Arabia
Expected Graduation: *June* 2027

PROFESSIONAL EXPERIENCE

Software Engineering Trainee 06/2026 – 08/2026
Fatima Al-Sabaa Company (*Capsule Tahawul Initiative*)

- Architected and deployed full-stack web applications using **React**, Node.js, Express, and TypeScript, ensuring end-to-end type safety across 15+ modules.
- Designed relational database schemas, oversaw migrations, and optimized data queries using Prisma ORM and **PostgreSQL**.
- Integrated conversational AI micro-endpoints (/api/ai) and secured online payment processing workflows using the Moyasar payment gateway.
- Managed cloud production environments, configured reverse-proxy security middleware (trust proxy), and handled deployments on **Vercel** and **Render**.
- Collaborated within Agile sprint teams supervised by senior leadership, utilizing **Notion** for task tracking and Git/GitHub version control workflows across 8+ sprint cycles.

PROJECTS

Capsule Tahawul Website
Technologies: *React, TypeScript, Node.js, Express, Prisma ORM, PostgreSQL, Tailwind CSS, Moyasar API, AI Integration*

- Developed a full-stack web platform featuring administrative dashboards, interactive catalogs, and real-time user workflows.
- Implemented modular RESTful API routing and handled asynchronous backend operations for dynamic data rendering.
- Configured robust database modeling with foreign key constraints, relational indexing, and automated migrations via Prisma and PostgreSQL.
- Successfully deployed and scaled the application across cloud environments (Vercel/Render), resolving environment variables and proxy configurations.

Motari – Vehicle Maintenance Management System

- Collaborated with a 5-member team to develop a web-based vehicle maintenance system, following a full SDLC: requirements gathering, system design, and database management
- Developed a user-friendly web interface to improve tracking of maintenance tasks and service history.

Mustahabbat & Sunan
Published on Google Play Store

- Managed the full app lifecycle, from initial coding to store optimization and publishing on the **Google Play Store,** ensuring 100% compliance with Google Play Console policies

Digital Tasbih App
Published on Google Play Store

- Built a simple Android application to simulate a digital tasbih, using Java / Android Studio.

VOLUNTEERING

Google Developer Groups (GDG)
Head of Design & Publishing Committee
- Oversaw visual content and publications for events.
- Collaborated with team members to improve community presence.

Programming Club
- Participated in Flutter workshops and gained foundational knowledge of Dart syntax.
- Speaker at Indie Game Tour event

SKILLS

- HTML5, CSS3, JavaScript
- Mobile App Development
- Software Engineering
- React.js, TypeScript
- Vercel & Render (Cloud Deployment)
- C++, Java, Python, SQL
- GitHub, VS Code
- Problem-solving
- PostgreSQL, Prisma ORM
- Notion (Agile Sprint Tracking)
